

1. In this case, the authors wanted to have a long-term solution we decided to add a rigid attachment to the four-element bridge ensuring long-term retention.
 - a. True
 - b. False
2. In this case, case conditions could lead to problems such as difficulty in hygiene and trapping food when chewing.
 - a. True
 - b. False
3. About one year later the patient stated his dissatisfaction with the case due to salivation and the food entrapment.
 - a. True
 - b. False
4. In this case, the presence of a physical model was not crucial for the patient to accept our proposal.
 - a. True
 - b. False
5. This case, involved a fixed bridge fully supported by a bar joint implant through on a telescopic rod.
 - a. True
 - b. False
6. The MK-1 system does not need a key to unlock the system that must always be on hand to release the overdenture.
 - a. True
 - b. False
7. The MK-1 is not passive and may result in a very significant volume in order to contain the whole mechanism.
 - a. True
 - b. False
8. The choice for the case was the component Swivel Loc classic that is very small, economical and can be considered indestructible by being passive and without any sophisticated or fragile mechanism.
 - a. True
 - b. False
9. To optimize the case, the authors started with rehabilitation correcting the curvature of the lower teeth.
 - a. True
 - b. False
10. A resin base was produced creating an invariable condition for setting dimensional information and occlusion relationship.
 - a. True
 - b. False
