 - a. True
 - b. False
3. After determining overall healing of the pontic areas, the abutment teeth were prepared with heavy 2.5mm reduction and 360° chamfer margins using coarse and fine bullet-nose diamond burs
 - a. True
 - b. False
4. In this case, careful attention was paid to the water to powder ratio to ensure the proper expansion.
 - a. True
 - b. False
5. In this case, a matrix of the approved provisionals was fabricated and used to evaluate facial and proximal reduction.
 - a. True
 - b. False
6. In preparation for the CAD/CAM design process, the dies were carefully trimmed and all undercuts were blocked out with wax.
 - a. True
 - b. False
7. The margins were cut back to increase the opacifying effect of material at the margins.
 - a. True
 - b. False
8. Zirconia is milled in a partially sintered state that allows for easier milling.
 - a. True
 - b. False
9. Final sintering was achieved by using a sintering oven that baked the zirconium at 1,615° C during a seven-hour period.
 - a. True
 - b. False
10. After steam cleaning, the frameworks were coated with ZirLiner to create an optimal bonding surface and baked at 860° C.
 - a. True
 - b. False

Passing quiz grades are worth ½ point documented scientific credit. Quiz results will appear on the NBC CDT Online Education Tracking System at www.nadl.org under the Certification Section, which is updated on or around the 15th of every month. Once completed, send your quiz to the National Board for Certification in Dental Laboratory Technology at the address or fax number below. Name:
